DETAILED ACTION

Claim Objections

1. Claims 1-2 and 5-7 are objected to because of the following informalities:

In claim 1, the terms "trouble codes" on line 11 and "the displayed trouble code" on line 14 should be "said trouble codes" and "the displayed trouble codes" respectively in order to avoid the antecedent basis problem. Similarly, the terms "the trouble code" on line 3 of claim 2 and "all supported monitors" should be "the trouble codes" and "all the supported monitors" respectively. Further, on line 1 of claims 5-7, "The process" should be "The method" respectively to be consistent. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The instant invention is directed to a simplified display method for displaying automobile diagnostic information in which the manual setup with regard to the make and model of the vehicle as required in the prior art is not required and that only those monitor functions that are supported by the vehicle are illuminated in the code reader. However, the instant specification is completely silent as to how the code reader is able to recognize the type of vehicle being tested without such manual setup as well as the different monitor functions that are supported by

different vehicles. In the absence of the aforementioned information, a person having ordinary skill in the art cannot make and use the claimed invention without undue experimentation.

4. The reference(s) is/are cited to show the related system(s). Applicant(s) should consider them carefully when responding to the current office action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Chin whose telephone number is (703) 305-9751. The examiner can normally be reached on Monday-Friday 8:00 AM to 4:30 PM.
